For 2022, Subaru introduced minor exterior styling tweaks and enhanced sound insulation to improve cabin quietness. The base trim gained additional standard features, such as a power rear gate on some models. Subaru also improved the adaptive cruise control system for smoother operation, contributing to the vehicle's overall refinement.

Performance and Engine Specifications

The best year Subaru Ascent should offer a balance of power, fuel efficiency, and smooth driving dynamics. Across all model years, the Ascent has utilized a turbocharged 2.4-liter flat-four engine paired with a continuously variable transmission (CVT), delivering competitive performance for the midsize SUV category.

Engine and Transmission

The turbocharged boxer engine produces 260 horsepower and 277 lb-ft of torque, providing ample power for daily driving and highway cruising. The CVT optimizes fuel economy while maintaining responsive acceleration. Subaru's Symmetrical All-Wheel Drive system enhances traction and stability in various driving conditions.

Fuel Efficiency

Fuel economy ratings for the Subaru Ascent generally range from approximately 21 miles per gallon (mpg) in the city to 27 mpg on the highway, depending on the drivetrain and trim level.
