Overview of Franciscan Breast Center Crown Point

The Franciscan Breast Center Crown Point is dedicated to providing top-tier breast health services tailored to the needs of women and men in the region. With a focus on prevention, early diagnosis, and effective treatment, the center combines cutting-edge technology with compassionate care. Patients can expect a multidisciplinary approach involving radiologists, oncologists, surgeons, and support staff working collaboratively to ensure optimal outcomes. The center also offers educational resources and community outreach programs to raise awareness about breast cancer risks and screening guidelines.

Diagnostic and Screening Services

Comprehensive diagnostic and screening services are the cornerstone of the Franciscan Breast Center Crown Point. These services are designed to detect breast abnormalities early, when treatment is most effective. The center follows evidence-based protocols to provide accurate and timely diagnoses for patients.

Mammography

Mammography is a primary screening tool used at the center to identify potential breast cancer signs. The facility offers both 2D and 3D mammography (tomosynthesis), which enhances detection accuracy by providing detailed breast images. Regular mammograms are recommended for women starting at age 40 or earlier for those with higher risk factors.

Ultrasound Imaging

Breast ultrasound is utilized to further evaluate abnormalities found during mammography or physical exams. It helps distinguish between solid masses and fluid-filled cysts, aiding in diagnosis and treatment planning. Ultrasound is a non-invasive and painless procedure commonly used in

conjunction with other imaging methods.

Biopsy Services

When suspicious areas are detected, the Franciscan Breast Center Crown Point offers minimally invasive biopsy procedures to obtain tissue samples for laboratory analysis. These include needle biopsies guided by imaging techniques to ensure precision. Biopsy results enable accurate diagnosis and guide subsequent treatment decisions.

Advanced Technology and Equipment

The center is equipped with state-of-the-art technology to support early detection and effective treatment of breast conditions. Investment in advanced equipment reflects the commitment to high-quality care and improved patient outcomes.

3D Mammography (Tomosynthesis)

3D mammography provides three-dimensional images of the breast, allowing radiologists to examine tissue layers in detail. This technology increases the likelihood of detecting small tumors and reduces false positives, minimizing unnecessary biopsies and anxiety for patients.

Digital Breast Tomosynthesis

Digital breast tomosynthesis is an enhanced form of mammography that captures multiple images from different angles. It creates a more comprehensive view of the breast, improving the detection of abnormalities, especially in dense breast tissue.

Computer-Aided Detection (CAD)

CAD software assists radiologists by highlighting areas of concern on mammograms. This technology serves as a second review, increasing the accuracy of interpretations and ensuring no potential signs of cancer are overlooked.

Expert Medical Team

The Franciscan Breast Center Crown Point boasts a team of highly skilled and experienced medical professionals dedicated to breast health. This multidisciplinary group collaborates to deliver personalized care plans based on each patient's unique needs.

Board-Certified Radiologists

Radiologists specializing in breast imaging play a crucial role in diagnosing breast conditions. Their expertise in interpreting mammograms, ultrasounds, and MRIs ensures precise detection and evaluation of abnormalities.

Breast Surgeons

Experienced breast surgeons provide surgical consultation and treatment options, including lumpectomy, mastectomy, and reconstructive procedures. They work closely with patients to determine the most appropriate surgical approach tailored to individual cases.

Oncologists and Medical Specialists

Medical oncologists and other specialists at the center manage chemotherapy, hormone therapy, and targeted treatments for breast cancer patients. Their involvement ensures coordinated care throughout the treatment journey.

Patient-Centered Care and Support

Patient well-being is a priority at the Franciscan Breast Center Crown Point, where comprehensive support services are integrated into the care process. This approach addresses physical, emotional, and educational needs.

Personalized Care Plans

Each patient receives a customized care plan based on diagnostic findings, risk factors, and personal preferences. This individualized strategy enhances treatment effectiveness and patient satisfaction.

Counseling and Emotional Support

Recognizing the emotional impact of breast health issues, the center provides access to counseling services, support groups, and patient education programs. These resources help patients and families cope with diagnosis and treatment challenges.

Navigation Services

Patient navigators assist individuals in understanding their care pathway, scheduling appointments, and accessing community resources. Navigation services streamline the treatment process and reduce patient stress.

Benefits of Choosing Franciscan Breast Center Crown Point

Selecting the Franciscan Breast Center Crown Point for breast health services offers numerous advantages that contribute to improved outcomes and patient experience.

- **Comprehensive Services:** From screening to treatment, all breast health needs are addressed in one location.
- **Advanced Diagnostic Tools:** Utilization of cutting-edge imaging and biopsy techniques enhances accuracy.
- **Expert Multidisciplinary Team:** Coordinated care from specialists ensures thorough evaluation and treatment.
- **Patient-Focused Approach:** Emphasis on personalized care plans and emotional support improves overall satisfaction.
- **Convenient Location:** Situated in Crown Point, the center is easily accessible to local residents.
- **Educational Resources:** Programs aimed at prevention and awareness empower patients to take control of their health.

Preparing for Your Visit

Patients planning a visit to the Franciscan Breast Center Crown Point can enhance their experience by preparing in advance. Understanding what to expect and gathering necessary information helps facilitate a smooth appointment.

What to Bring

It is recommended to bring medical records, previous mammogram images, a list of current medications, and any relevant family history of breast cancer. This information aids healthcare providers in making informed decisions.

Appointment Process

Upon arrival, patients will undergo registration and may be asked to complete health questionnaires. Imaging exams are conducted by trained technologists, followed by interpretation from radiologists. Results are typically communicated promptly with recommendations for follow-up care if needed.

Insurance and Financial Considerations

The center accepts a variety of insurance plans and offers financial counseling to assist patients with coverage questions and payment options. Early contact with the billing department can clarify benefits and reduce unexpected expenses.
