Since Wordle provides feedback on each guess using colors to indicate correct or misplaced letters, players can use logical deduction to narrow down possibilities.

Starting with Common Letters

One of the best strategies involves beginning with words containing common vowels and consonants. Letters like E, A, R, S, and T appear frequently in English and can help reveal correct letters early. For example, guessing words like "SLATE" or "CRANE" can quickly identify key letters in the solution.

Using Feedback Effectively

Wordle's color-coded feedback system is crucial. Green indicates a correct letter in the right position, yellow signals a correct letter in the wrong position, and gray means the letter is not in the word. Utilizing this information systematically allows players to eliminate impossible combinations and focus on probable answers.

Maintaining a Logical Guessing Process

Players benefit from keeping track of previous guesses and the feedback received. Methodical elimination of letters and positions helps avoid repetitive or random guessing, increasing the chances of identifying the January 24 Wordle answer within the six allowed attempts.
