Understanding these updates is crucial for teams and officials to ensure compliance and avoid costly penalties.

Targeting Rule Modification

One of the most notable changes in 2022 relates to the targeting rule, which addresses hits deemed dangerous to the head or neck area. The revision clarifies the definition of targeting and modifies the review process for such penalties. Notably, the rule now allows for a more precise video review to confirm or overturn targeting calls, potentially reducing game stoppages and improving fairness in officiating.

Overtime Procedure Adjustments

These adjustments are designed to shorten game duration and minimize player fatigue without compromising the excitement of overtime play.

Kickoff and Fair Catch Rules

To enhance player safety during kickoffs, the NCAA football rule book 2022 introduced changes that limit running starts and allow for fair catches inside the 25-yard line to result in a touchback. This reduces high-speed collisions and incentivizes strategic gameplay on special teams.
