How to Obtain Field Research Tasks

Players obtain Field Research tasks by spinning PokéStops. Each PokéStop provides one task per day, and players can hold up to three tasks simultaneously. Completing these tasks grants rewards such as Poké Balls, Berries, Stardust, and encounters with rare Pokémon. Collecting stamps from seven completed Field Research tasks allows players to earn a Research Breakthrough reward, which often includes encounters with powerful or rare Pokémon.

Special Research Stories Available in August 2023

Special Research tasks are storyline-driven challenges that provide unique narratives and substantial rewards. These tasks are typically available for a limited time and often coincide with special events or new Pokémon releases.

Current Special Research in August 2023

In August 2023, trainers can participate in the following Special Research storylines:

- **Legendary Quest: The Return of Zapdos** – A multi-step research task that culminates in an encounter with the Legendary Pokémon Zapdos.
- **Exploration Challenge: Discover the Unova Region** – This story encourages trainers to catch and evolve Pokémon native to the Unova region.
- **Shiny Hunt Special Research** – Focused on increasing shiny encounter rates through a series of capture and battle tasks.

How to Start Special Research

Special Research tasks are typically initiated through in-game notifications or by interacting with Professor Willow. Once started, these research stories progress through multiple stages, each requiring players to complete specific objectives. Completion of each stage unlocks rewards such as rare Pokémon encounters, items, and XP bonuses.

Timed Research Events and Bonuses

Timed Research tasks are limited-time challenges introduced during special events or seasonal promotions. These tasks offer unique rewards and often align with broader in-game celebrations.

August 2023 Timed Research Highlights

During August 2023, several Timed Research events are scheduled, including:

- **Summer Festival Timed Research** – Featuring water-type Pokémon catch challenges and exclusive event items.
- **Community Day Special Tasks** – Available during Community Day weekends, offering tasks that reward rare Pokémon encounters and XP boosts.

- **Team GO Rocket Event Tasks** – Focused on battling and defeating Team GO Rocket grunts and leaders for exclusive rewards.

Participating in Timed Research

To engage in Timed Research, players must start the tasks during the event window. These tasks often require completing objectives within a limited time frame to earn event-exclusive Pokémon encounters, items, and bonuses. It is important to monitor event schedules to avoid missing these opportunities.

Strategies for Efficient Completion of Research Tasks

Successfully completing Pokémon GO research tasks in August 2023 requires strategic planning and resource management. Employing effective techniques can help trainers maximize rewards and progress faster.

Prioritize Tasks Based on Rewards

Focus on research tasks that offer high-value rewards such as rare Pokémon encounters, Stardust, or rare items. Prioritizing these tasks ensures optimal use of time and effort.

Utilize In-Game Events

Taking advantage of in-game events and bonuses, such as increased spawn rates or double XP periods, can accelerate task completion. Combining tasks with events also increases the likelihood of encountering special Pokémon.

Coordinate with Friends and Community

Collaborating with friends for trades, raids, and battles can streamline task completion. Participating in raid groups and community events enhances the ability to complete challenging research tasks efficiently.

Manage Inventory and Resources

Maintaining sufficient Poké Balls, Berries, and healing items ensures uninterrupted gameplay. Regularly managing inventory space and resources can prevent delays in task completion.
