Overview of the SNHU Project Management Degree

The SNHU project management degree is tailored to develop proficient project managers capable of leading diverse teams and managing complex projects. Southern New Hampshire University offers this degree through an online format, making it accessible to working professionals and those balancing other commitments. The program focuses on foundational principles such as project planning, risk management, budgeting, and stakeholder communication. Students gain insight into both traditional and agile project management methodologies, ensuring adaptability in various business environments. This degree is ideal for individuals seeking to advance their careers or transition into project management roles.

Program Objectives

The primary objectives of the SNHU project management degree include cultivating critical thinking, leadership, and organizational skills. Graduates are expected to demonstrate competence in managing scope, time, cost, quality, and resources effectively. The curriculum promotes ethical considerations and strategic decision-making, preparing students for real-world challenges. Emphasis is placed on developing a comprehensive understanding of project life cycles and the ability to apply project

management software tools.

Delivery Format

The degree is offered primarily online, enabling students to learn at their own pace and from any location. This flexible delivery model caters to diverse learners, including full-time employees and international students. The online platform provides interactive coursework, video lectures, discussion forums, and access to faculty expertise. Such a format fosters a collaborative learning environment and supports asynchronous learning schedules.

Curriculum and Course Structure

The curriculum of the SNHU project management degree is structured to cover essential project management concepts, techniques, and applications. It blends theoretical foundations with practical assignments to reinforce learning outcomes. The program typically spans 120 credit hours for a bachelor's degree, with specialized courses in project management as well as general education requirements.

Core Courses

Core courses focus on the critical areas of project management, including:

- Project Management Fundamentals
- Risk Management and Quality Control
- Project Scheduling and Cost Estimation
