American Imperialism and Expansion

During the period covered by unit 7 apush, the United States emerged as a significant imperial power. The late 19th and early 20th centuries marked a shift from continental expansion to overseas territories and influence. This era was characterized by the acquisition of new lands, military interventions, and an assertive foreign policy that sought to extend American economic and political interests globally.

Causes of American Imperialism

The motivations behind American imperialism included economic interests, strategic considerations, and ideological beliefs such as Social Darwinism and the "White Man's Burden." Industrial growth created a need for new markets, while naval strategists like Alfred Thayer Mahan emphasized the importance of a strong navy and overseas bases. Additionally, there was a prevailing sense of cultural superiority that justified expansion.

Key Events in Expansion

Unit 7 apush highlights several critical events illustrating American expansionism:

- The Spanish-American War (1898), which resulted in the U.S. acquiring Puerto Rico, Guam, and the Philippines.
- The annexation of Hawaii in 1898, expanding American influence in the Pacific.
- The construction of the Panama Canal, which facilitated naval and commercial movement between oceans.
- The Roosevelt Corollary to the Monroe Doctrine, asserting the right to intervene in Latin America.

The Progressive Era Reforms

The Progressive Era, spanning the first two decades of the 20th century, was a period of widespread social activism and political reform aimed at addressing the problems caused by industrialization, urbanization, and corruption. Unit 7 apush emphasizes how progressives sought to improve society through government intervention and regulation.

Political Reforms

Reforms during this era targeted political machines and increased democratic participation. Key measures included the introduction of the direct primary, the initiative, referendum, and recall processes, as well as the 17th Amendment, which established the direct election of U.S. senators. These changes aimed to reduce corruption and give citizens more control over their government.

Economic and Social Reforms

Progressives tackled issues like labor conditions, monopolies, and public health. The establishment of regulatory bodies such as the Interstate Commerce Commission and the Federal Trade Commission helped curb corporate abuses. Landmark legislation like the Pure Food and Drug Act and the Meat Inspection Act improved consumer protections. Additionally, labor reforms addressed child labor, working hours, and workplace safety.

Key Progressive Figures

Several leaders shaped the Progressive movement:

- Theodore Roosevelt, known for trust-busting and conservation efforts.
- Woodrow Wilson, who advanced progressive reforms through his New Freedom platform.
- Jane Addams, a pioneer in social work and settlement house movements.

The Roaring Twenties and Cultural Shifts

The decade following World War I, often called the Roaring Twenties, was marked by economic prosperity, cultural dynamism, and significant social changes. Unit 7 apush covers how this period reflected both modernism and traditionalism in American society.

Economic Growth and Consumerism

Technological innovations and mass production techniques fueled rapid economic expansion. The automobile industry, led by Henry Ford's assembly line, revolutionized transportation and manufacturing. Consumer culture blossomed, with increased availability of radios, household appliances, and entertainment options like movies and jazz music.

Social and Cultural Developments

The 1920s saw shifts in social norms, including greater independence for women symbolized by the flapper culture and the passage of the 19th Amendment granting women the right to vote. The Harlem Renaissance showcased African American cultural achievements, while prohibition sparked both reform efforts and organized crime. At the same time, nativism and racial tensions increased, exemplified by the resurgence of the Ku Klux Klan and restrictive immigration laws.

Political Climate

The decade was characterized by a conservative political atmosphere, with presidents favoring limited government intervention in the economy. The administration of Warren G. Harding and Calvin Coolidge promoted business-friendly policies and tax cuts, reflecting a return to laissez-faire principles after the wartime economy.

The Great Depression and New Deal Policies

Unit 7 apush extensively covers the Great Depression, the most severe economic downturn in U.S. history, and the federal government's response through the New Deal. This era reshaped American political and economic life profoundly.

Causes and Impact of the Great Depression

The stock market crash of 1929 symbolized the onset of the Great Depression, but underlying causes included overproduction, uneven wealth distribution, banking failures, and weak international trade. The depression led to massive unemployment, poverty, and widespread hardship affecting millions of Americans.

The New Deal Programs

President Franklin D. Roosevelt's New Deal implemented a series of programs and reforms aimed at relief, recovery, and reform. These included:

- The Civilian Conservation Corps (CCC), providing jobs in natural resource conservation.
- The Agricultural Adjustment Act (AAA), which sought to stabilize agricultural prices.
- The Social Security Act, establishing a safety net for the elderly and unemployed.
- The National Labor Relations Act, protecting workers' rights to unionize.

These initiatives expanded the role of the federal government in economic and social affairs, setting precedents for future policies.

Criticism and Legacy

The New Deal faced opposition from both conservatives, who viewed it as government overreach, and radicals, who demanded more extensive reforms. Nevertheless, it fundamentally altered the American political landscape and helped restore public confidence.

World War II: Causes and Consequences

The final segment of unit 7 apush focuses on World War II, exploring the conflict's origins, America's involvement, and its profound effects on the nation and the world.

Entry into the War

Initially committed to neutrality, the United States gradually shifted toward intervention due to Axis aggression and threats to global stability. The attack on Pearl Harbor in 1941 propelled the U.S. into the war, aligning with Allied powers to defeat Germany, Italy, and Japan.

Homefront and Mobilization

The war effort transformed American society through mass mobilization of troops and resources. The government coordinated industrial production, leading to an economic boom that ended the Great Depression. Women entered the workforce in unprecedented numbers, symbolized by "Rosie the Riveter," while rationing and war bonds became commonplace.

Impact and Outcomes

World War II resulted in significant geopolitical changes, establishing the United States as a global superpower. The conflict also set the stage for the Cold War and accelerated movements for civil rights and decolonization worldwide.
