Overview of the WVU Psychiatry Residency Program

The WVU psychiatry residents are part of a nationally recognized training program that emphasizes comprehensive psychiatric education. The residency is designed to prepare physicians for board certification and independent clinical practice across a broad spectrum of psychiatric subspecialties. The program integrates evidence-based medicine with compassionate patient care, focusing on both inpatient and outpatient settings. WVU's Department of Psychiatry and Behavioral Medicine offers a supportive and collaborative learning environment, promoting professional development and lifelong learning. Residents benefit from access to cutting-edge resources, including telepsychiatry and interdisciplinary collaborations.

Curriculum and Training Structure

The curriculum for WVU psychiatry residents is structured to provide a progressive and thorough educational experience over four years. The program balances clinical duties, didactic sessions, and research activities to ensure a well-rounded residency experience. Residents engage in core

psychiatry topics, including psychopharmacology, psychotherapy, neuropsychiatry, and child and adolescent psychiatry. Emphasis is placed on developing diagnostic acumen and treatment planning skills. The curriculum also includes training in emergency psychiatry and consultation-liaison psychiatry, enabling residents to manage acute psychiatric conditions effectively.

Yearly Breakdown of Training

Each postgraduate year in the WVU psychiatry residency program has specific learning objectives and clinical responsibilities:

- **PGY-1:** Focus on foundational clinical skills through rotations in internal medicine, neurology, and general psychiatry.
- **PGY-2:** Enhanced exposure to inpatient psychiatric care and beginning outpatient experiences.
- **PGY-3:** Advanced outpatient psychiatry, child and adolescent rotations, and elective opportunities.
- **PGY-4:** Leadership roles in clinical settings, subspecialty training, and preparation for board examinations.

Clinical Rotations and Experiences
